Notes:

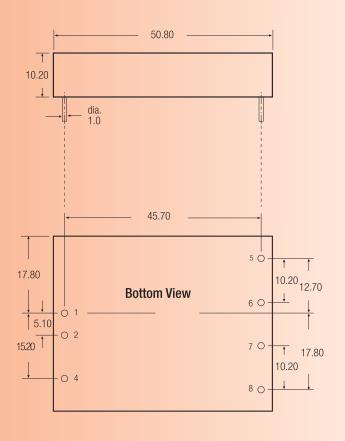

- An external filter capacitor is required for normal operation. The capacitor should be capable of handing 1A ripple current for 48V/24V models. RECOM suggest: Nippon chemi-con KMF series, 220μF/100V, ESR 90m Ω.
- 2. BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C (Ground fixed and controlled environment).
- 3. Simulated source impedance of 12µH. 12µH inductor in series with +Vin.
- 4. Maximum value at nominal input voltage and full load of standard type.
- 5. Typical value at nominal input voltage and full load.
- 6. Test by minimum Vin and constant resistor load.
- 7. The ON/OFF control function can be positive or negative logic. The pin voltage is referenced to negative input.

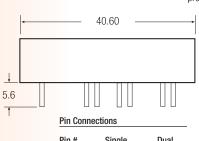

Positive logic ON/OFF is standard, no suffix (Ex. RP30-2405SEW)

Negative logic ON/OFF is marked with suffix-N (Ex. RP30-2405SEW/N).

- 8. Heat sink is optional and P/N: 7G-0011A. Powerline DC/DC Converters can be ordered with pre-mounted heatsinks including antivibration fixing clips (add suffix -HC). See Application Notes for heatsink details.
- 9. The dual output required a minimum 10% loading on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specification.
- 10. See application notes for EMI-filtering.
